5

6

IF YOU HAVE AN
STI/STD IT IS
EASIER FOR
YOU TO GET HIV

7

YOU ARE MORE LIKELY TO GET HIV IF
YOUR PARTNER HAS HIV AND AN STI/STD

8

WHAT PUTS YOU AT RISK FOR STI/STD'S AND HIV?

Having sex of any kind

Sharing needles

Have had an STD

Have more than one sex partner

Are under the influence of drugs and alcohol

9

HOW CAN YOU PROTECT YOURSELF FROM HIV AND STI/STD'S?

Avoid or put off having sex. If you do have sex, use a male latex or female condom every time.

Latex male condoms and female condoms, when used the right way every time, are very effective in preventing HIV and many other STDs. Condoms may prevent the spread of other STDs like HPV or genital herpes, only when the condom covers the infected areas or sores.

Talk with your partner about HIV and STDs.

Don't share drug "works"

Get STD and HIV counseling and testing.

10

OTHER REASONS WHY
COMPREHENSIVE
ST/STD AND HIV
TESTING ARE
IMPORTANT.

11

PEOPLE ARE MORE
LIKELY TO GET AN
HIV TEST WHEN IT IS
ACCOMPANIED WITH
A ST/STD TEST.
